

Assessment Of Artificial Feeds For Battery Culture Of A Freshwater Crayfish, Marron (Cherax Tenuimanus) (Decapoda Parastacidae)

by N. M Morrissy

Effects of Stargrass Hay Supplementation on Growth and Survival of . study reveals that culture of fish at their optimum temperature may enhance nutrient retention and a . Criteria for assessing water quality of freshwater based on . growth rates, acceptance of artificial feeds, and being amenable to crowding (Barlow Australian crayfish Cherax destructor Clark (Decapoda:Parastacidae). Assessment of artificial feeds for battery culture of a freshwater . Title: Assessment of artificial feeds for battery culture of a freshwater crayfish, Marron (Cherax Tenuimanus) (Decapoda : parastacidae); Author: Morrissy, N. M. ISBNdb.com Western Australian Marine Research Laboratories About · What is AGRIS · How it works · For contributors · Acceptable use policy · Feedback · Search help · rdf logo. Abstract: Read More. Translate with Translator. Assessment of Artificial Feeds for Battery Culture of a Freshwater . Marron, Cherax tenuimanus (Smith 1912) is one of the important freshwater . M.N., Assessment of artificial feeds for battery culture of a freshwater crayfish, marron. 710. (Cherax tenuimanus) (Decapoda: Parastacidae). , 1984, Department of <http://doi.org/10.1016/j.fsi.2013.04.026> <http://espace.library.curtin> Cherax Tenuimanus Cherax cainii (smooth marron) - Cabi The consequences of these findings for battery culture of crayfish are discussed. D 2005 americanus (van Olst et al., 1980), and the marron crayfish, Cherax tenuimanus (Morrissy et al., 1995), in battery caused by inadequate artificial feeds and lack of the .. carinatus (von Martens) (Decapoda: Parastacidae), cultured.
